Dear Recruiter,

I am excited to apply for the Software Engineering Internship position at Microsoft. I am currently pursuing a Bachelor of Engineering in Computer Science at RGPV University, where I have developed a strong foundation in software development and engineering principles. The opportunity to intern at Microsoft aligns perfectly with my career goals of working with cutting-edge technology and contributing to impactful projects, and I am particularly drawn to Microsoft's mission of empowering individuals and organizations.

During my internship at BlueMango Labs, I spearheaded the redesign of user interfaces for the SuperAstro and Kosmic apps, which resulted in a 25% increase in user retention. I also implemented Domain-Driven Design, enhancing development efficiency by 30%, and integrated advanced backend technologies to support a tenfold increase in concurrent users. My role involved pioneering user engagement enhancements through the deployment of Firebase notifications, leading to a 35% increase in user activity.

One of my most notable achievements is winning the CodeEnergia National Hackathon, where I led the development of "EcoSync," an app that tracks electricity usage with 95% accuracy. This project not only showcased my technical skills but also demonstrated my ability to lead a team in delivering high-impact solutions that lowered utility costs by 20%.

I am confident that my background, skills, and enthusiasm make me a strong candidate for this internship. I am dedicated to continuous learning and growth, and I believe that interning at Microsoft will provide the perfect environment for me to further develop my abilities while contributing to your innovative projects.

Thank you for considering my application. I am eager to discuss how my experiences and goals align with Microsoft's vision. Please feel free to contact me at harshsingh704888@gmail.com or +91 704 7272 436. I look forward to the opportunity to contribute to your team.

Sincerely,

Harsh Singh
